PROFESSIONAL SUMMARY

Computer Information Systems graduate who builds full-stack web applications and deploys and operates them on Microsoft Azure. Comfortable across the development-to-infrastructure stack. Currently completing cooperative training at Al-Othman Holding, administering Azure resources and Entra ID identity management and building Power Automate workflows that cut manual work for the infrastructure team. Independently ships React applications, including a platform that integrates the Anthropic Claude API to classify user questions. Certified in Power BI and completing Duke University's MLOps specialization. Seeking an entry-level role at the intersection of software development and cloud infrastructure.

TECHNICAL SKILLS

Cloud & Infrastructure: Microsoft Azure (VMs, App Service, Entra ID), Windows Server, Active Directory, Group Policy (GPO), Virtualization, Power Automate.

Development: JavaScript, React, HTML5, CSS3, REST APIs, Anthropic Claude API Integration, Git.

Data & Analytics: Power BI, DAX, Microsoft Excel, Data Visualization, Data Quality Management.

Security & Networking: FortiGate Firewalls, Microsoft Defender, IAM & Role-Based Access Control (RBAC), Network Troubleshooting.

Enterprise Systems: Oracle ERP (foundational exposure), Microsoft 365, Microsoft Exchange, End-User Support.

PROFESSIONAL EXPERIENCE

Cloud & IT Infrastructure Cooperative Trainee

Jul 2026 – Present

Al-Othman Holding Company — Al Khobar, Saudi Arabia

- Provision and administer Microsoft Azure cloud resources — virtual machines and identity and access management (IAM) through Microsoft Entra ID — in a live enterprise environment.
- Build Power Automate workflows that automate recurring IT and administrative processes, reducing manual workload for the infrastructure team.
- Administer core enterprise platforms (Active Directory, Group Policy, Exchange, Windows Server VMs) supporting company-wide daily operations.
- Document Oracle ERP operations and standardize IT infrastructure procedures for the team's internal reference
- Diagnose and resolve hardware and software incidents across enterprise devices and workstations, minimizing end-user downtime.

PROJECTS

- [Smart Alumni Community Platform](#) — **University Capstone (2026)**: Full-stack web platform for alumni networking; integrated the Anthropic Claude API (LLM) to automatically classify user questions into categories; deployed on Microsoft Azure App Service.
- [FitLit — Online Coaching Platform](#) (2026): Multi-role web application with three access tiers (Admin/Trainer/Trainee), invitation-based registration, workout and nutrition planning, and role-based access control (RBAC); deployed on Vercel.
- [PocketMote — Multiplayer Mini-Game Console](#) (2026): Browser-based game console where phones act as motion and tilt controllers for three multiplayer mini-games; built with HTML5 Canvas and JavaScript, real-time device sync through Supabase Realtime; deployed on Vercel.

EDUCATION

B.Sc. Computer Information Systems

Taibah University — Madinah, Saudi Arabia

CERTIFICATIONS

- MLOps Specialization — Duke University, Coursera (*in progress*).
- [Microsoft Power BI Data Analyst](#) — Coursera.
- [Meta Front-End Developer](#) — Coursera.
- [STC Data Analytics](#)
- [SDAIA Fundamentals of Artificial Intelligence](#).
- [Cisco Introduction to Modern AI](#)
- [Cisco Introduction to Cybersecurity](#).
